INTRODUCTION OIL & GAS: *Upstream Overview*

PUBLIC TRAINING

- 23 APR 2026
- 14 MAY 2026
- 24 JUN 2026

JOIN NOW

PER PAX

RM1,500

Venue: Hotel in Kuala Lumpur
(To be confirmed)

This course introduces the upstream sector (Exploration & Production) covering oilfield discovery, drilling and production. Participants will gain essential knowledge of the oilfield life cycle, key roles, and the geological, technical, and economic aspects of upstream operations, with a focus on Malaysia's oil & gas industry.

INTRODUCTION TO OIL & GAS: UPSTREAM OVERVIEW

INTRODUCTION TO OIL & GAS: UPSTREAM OVERVIEW

1 Day

PROGRAM OVERVIEW

The petroleum industry involves exploring, producing, refining, transporting, and marketing oil and gas. The upstream sector focuses on finding resources, drilling wells, and bringing hydrocarbons to the surface.

This course gives a concise overview of the oilfield life cycle, upstream phases from exploration to decommissioning, key technical and economic aspects, and the context of Malaysia's oil and gas industry.

WHO SHOULD ATTEND?

- Employees new to the industry
- Contractors
- Government policy-makers
- Professionals and advisors
- Members of the community seeking a basic understanding of the industry
- Businesses intending to enter the industry

KEY MODULES

- Introduction to Oil & Gas
- Exploration Activity
- Drilling Operation
- Oil & Gas Field Development
- Producing the Hydrocarbon and Production Facilities
- Decommissioning the Facilities

COURSE METHODOLOGY

- Interactive
- Lecture Group
- Dynamics Case
- Studies

BENEFITS

The delegates will benefit from the knowledge and understanding of:

- History and Characteristics of Oil and Gas
- Exploration and Surveys
- Drilling Rigs and Drilling a Well
- Developing an oilfield
- Production and Work-over
- Oil and Gas Transportation and Decommissioning

WHAT WILL YOU LEARN?

- Learn and understand the technical jargons in the upstream sector.
- Describe the main activities in the upstream sector.
- Understand the inter dependency of activities from exploration until abandonment.
- Understand the value chains across the industry.

YOUR EXPERT TRAINER

AHMAD FARIZ AZHAR

Ahmad Fariz Azhar has extensive experience in the oil and gas industry. Currently he is a training consultant specializing in upstream activities and project management. He is experienced with offshore drilling operation specializing in Measurement & Logging While Drilling (MLWD) with and was heavily involved with the execution phase of the job where Safety & Service Quality are mandatory. Throughout his career in offshore drilling, he had involved with exploration and development drilling campaign with various E&P Operators in Malaysia.

Fariz was also experienced in managing the engineering and business development aspect in the oil & gas specialty oilfield chemicals specializing in the Production Chemicals and Completion & Workover Chemicals. He also had experience in Project Management related to Petroleum Engineering Project such as Area Development Plan (ADP) and Seismic Data Processing & Seismic Interpretation. Knowledgeable on different working cultures as have working experience locally (Malaysia) and internationally (Thailand, Myanmar, Vietnam, Brunei, Singapore, UAE, US, and UK).
